STEP 1
Take the foam sheet and lay it on the ground. Use the foam sheet as a base to assemble the chair. That will avoid any scratches to the chair.

STEP 2
Place the wheelbase upside down and carefully insert the 5 wheels (found in the accessories box).

STEP 3
Turn the wheel base and place gas lift piston in the middle. Slide the cover on top of it.

STEP 4
Remove the M8 screws pre installed in the backrest using the allen key provided in the tool kit.

STEP 5
Put the seat on the foam. Now carefully place the backrest on the seat. Align the screw holes in the back rest with the holes in the recline mechanism.

STEP 6
Insert the M8 screws first on the side with recline mechanism and then on the other side.

STEP 7
Attach both the magnetic side covers

STEP 8
Now lift the chair and gently set it facing downwards.

STEP 9
Attach the multi-functional mechanism to the bottom of seat with 4 M8 screws. Make sure that the tilt tension knob is facing the front side of the chair.

STEP 10
Align the grooves of the lever handles with the notches and insert firmly. Make sure to insert them horizontally facing front side of the chair.

STEP 11
Grab the assembled wheel base and insert the gas lift piston into the socket of the multi-functional mechanism.

STEP 12
Hold the wheelbase from the bottom and the back- rest and carefully place the chair in the upright position.

USER MANUAL

Upload the photo of your setup with our product and tag us on social media platforms [@cybe_art](https://twitter.com/cybe_art) to get featured on our website's #CYBERSQUAD section and our social media.

RECLINE MECHANISM

Carefully pull the lever and lean back until you've reached your desired angle and release the lever to its original position.

A

LUMBAR ADJUSTMENT

Turn the knob clockwise to raise the lumbar support and anti-clockwise to lower it. Adjust as per your convenience and do not over-turnpast its maximum and minimum settings.

B

MULTI TILT MECHANISM

Use the right lever for height adjustment and left lever for tilting the chair. Push up to unlock and down to lock the tilt mechanism.

C

4D ARMREST

Press and hold the lever on the outside of the armrest to make the height adjustment.

D

4D ARMREST

a) Button in the front is used for length adjustment and angle swivel.
b) Button on the inner side is for width adjustment.

E

ARMREST ADJUSTMENT

Loosen the M8 screws at the bottom of the armrest to increase or increase the distance between the two armrest. Adjust as per your convenience and tighten them back.

F

TILT TENSION

Turn the knob clockwise to loosen and anti-clockwise to tighten the tilt tension of the chair.
